NEWSLETTER OF THE OHIO BOARD OF EXAMINERS OF ARCHITECTS

SPRING 1993

## PRESIDENT'S MESSAGE

1993 has been designated the year of "Awareness" by the Board. During this year it will be the objective of the Board to bring about a greater awareness to the public of the legal requirements for engaging architects for building projects, to the registrants of the laws and rules governing their practices and their relationships to their clients, to the students and interns of their requirements for obtaining registration, education, internship and the examination. And to the legislature of the need for laws in Ohio preventing unlicensed people from authoring construction documents used to obtain building permits.

Although we are in a tight economy and the Board funding does not allow for widespread public relations opportunities, we will be attempting to bring our message to as many areas that we can. We welcome your attendance at our regular meetings.

John F. Lipaj

## PRACTICE REQUIREMENTS

More and more frequently the Board is finding that architects are not aware of the requirements concerning the manner in which they practice. Or at least the manner in which they contract for work. Many of our enforcement activities involve builders, drafters who contract for work and then sub-contract the project, in whole or in part, to architects. It is illegal for anyone other than an architect to either provide or to offer to provide architectural services. Violators face the possibility of injunctive action or criminal prosecution. When an architect chooses to participate in such an arrangement, the architect may be jeopardizing his or her license as well. It is unlawful for an architect to aid and abet another in the practice of architecture, it is unlawful for an architect to seal documents not prepared by the architect or under the direct supervision of the architect.

**CERTIFICATES OF AUTHORIZATION** All organizations providing architectural services are required under Ohio law to procure from this Board a Certificate of Authorization to provide architectural services. An architect employed by a company cannot offer architectural services to the public through that company unless the company has a Certificate of Authorization. An architect cannot contract to render architectural services to an unlicensed entity who, in turn, provides the architect's services to another. This amounts to brokering of architectural services and is prohibited. The unauthorized organization providing the services of the architect to another may be enjoined by the courts to prohibit such activities and the architect may face disciplinary action through the Board.

**PLAN STAMPING** An architect who sells his seal is in violation of Ohio law and may lose his or her license for such an offense. Plan stamping encourages the creation of organizations which are providing a wide range of architectural services. When a building department requires a seal, these people simply find someone with a seal who is willing to stamp the documents for a fee. Such activity undermines the entire premise of licensure and is an offense to every ethical architect as well as a hazard to the public health, safety and welfare. The Board considers that all documents required to be submitted to a building department for obtaining a building permit, depending upon the nature of the documents, must be sealed by an architect or a professional engineer who has prepared the documents or under whose direct supervision they have been prepared.

# EXAM RESULTS

In June 1992, the Board administered the ARE to 428 candidates. Of these candidates, 125 new architects were registered. The 400 candidates sat for 2,118 exam divisions and 1,437 divisions were passed for an overall passing rate of 68%. The December examination for the graphic divisions of the exam was administered to 277 candidates. The statistics for that exam are given in the second table.

The following chart compares the passing rate of Ohio candidates with the passing rate for our NCARB Region (Ohio, Indiana, Iowa, Illinois, Kentucky, Minnesota, Michigan, Missouri and Wisconsin) and with the passing rate of all jurisdictions administering the exam, including all of the United States, most of Canada, the Virgin Islands, Puerto Rico, Guam, Bermuda and the Northern Marianas.

June 1992

<u>Division</u>	<u>Ohio</u>	<u>Region</u>	<u>All Jurisdictions</u>
A - Pre-Design	75%	68%	57%
B - Site Design (Written)	87%	80%	68%
B - Site Design (Graphic)	53%	49%	41%
C - Building Design	35%	34%	30%
D/F - Structures-General	78%	77%	68%
E - Structures-Lateral Forces	69%	63%	58%
G - Mech, Plumbing & Elec.	69%	66%	51%
H - Materials & Methods	74%	73%	60%
I - Construction Documents	77%	74%	65%

December 1992

<u>Division</u>	<u>Ohio</u>	<u>Region</u>	<u>All Jurisdictions</u>
B - Site Design (Graphic)	53%	49%	41%
C - Building Design	35%	34%	30%

Of the six states administering the Building Design to over 200 candidates, Ohio candidates had the second highest passing rate.
